Wriggly Worm Walk

Did you know that worms are one of the most important animals in the world? Charles Darwin, the man who realised humans were evolved from monkeys, also spent 40 years studying worms! Follow the worm trail to help you answer the questions and find out more about these awesome animals! At each stop, there is a wormy activity to try out!

Where do worms have light sensors?

When would worms appear above ground?

What makes a strong taste in some plants?

What do stones help worms do?

What do worms poop out?
